San Antonio's toughest health problems the prevalence of poverty, illiteracy and unemployment that continues to run its course through the community. Those factors have the ability to undo years of work and millions of dollars invested to improve the community's well being. In San Antonio, ten zip codes have been identified as high-risk areas for ongoing public health problems. The map of Bexar County below outlines the areas in red, green and yellow, Red denotes the highest number of low-income households, unemployment, single or school-age mothers, incidents of drug abuse, crime, overcrowded housing, high school dropouts and lack of higher-level educational opportunities. Zip codes marked in yellow show emerging concentrations of the same harmful health indicators. Zip codes in green have a high rate of health indicators, but a lower population count than the others. Many of these same zip codes show families in their second or third generation of poverty.
